Embedded Tutoring Support

What is embedded tutoring support?
- Embedded tutoring support provides a non-remedial approach to learning that supports students toward academic success by integrating "what to learn" with "how to learn." Embedded tutoring consists of in-class support and out-of-class, one-on-one or group tutoring sessions driven by students' needs, specifically for the summer semester at American University only. It is implemented in high-risk courses in consultation with faculty and academic departments and is evaluated by Student Academic Services staff. This is a free service offered to all students in eligible courses. All students of various backgrounds are encouraged to schedule tutoring sessions and meet with their Embedded Tutors, as it is a voluntary program.

Who are Embedded Tutors?
- Embedded Tutors are American University students who can articulate course content well and engage their peers academically. Using out-of-class, peer-to-peer collaboration, Tutors will bridge course content that aims to increase student confidence and independence.

How can students access the schedule for tutoring?
- Students can access the schedule of Embedded Tutors and PASS Program Tutors using the "Summer 2024 - PASS Program" schedule on **WCOnline**. Students can also utilize **WCOnline** to schedule appointments with our available Tutors across different academic support programs.

What courses have embedded tutoring support in Summer 2024?

Course	Faculty	Term	Embedded Tutor
ACCT-240	Yijiang Zhao	Summer Session I	Zachary Taylor
BIO-110	Holly Swanson	Summer Session I	Mariam Coulibaly
CHEM-110	Marjan Alaghmand	Summer Session I	Haylee Schwind
CHEM-310	Egidijus Zilinskas	Summer Session I	Sofia Palau
ECON-150	William Mooney	Summer Session I	Alexis Alarcon
STAT-204	Nimai Mehta	Summer Session I	Adam Poloney
STAT-427/627	Jun Lu	Summer Session I	Bright Amenyo
